

Sprint Retrospective 09: 2/16 - 2/25

Scrum Master: Sarah S.

What went well this sprint?

- Successfully followed through controller and AJAX demos from lectures
- Implemented demos into our own application
- Started designs for app-specific features
- Project plan revisions approved by client
- DAR Report metrics approved for Geolocation!

What went wrong or lacked this sprint?

- Miscommunication on email DAR Report
 - Using team hours on email integration for report became unnecessary
- Misaligned priorities between team members
 - Inconsistent workflow, causing delays in completed work items
- Unable to unit test security and account center features

What will we carry over to the next sprint? (Action Plan)

- Continue designing app-specific features in order to start coding by the end of February
- Continue feedback and revisions during office hours and via email on DAR report for Geolocation
 - Approve DAR report by the start of March
- Finish unit testing for security and account center features by end of next sprint

What will we do differently next sprint? (Action Plan)

- Start designs for all app-specific features in order to have at least 2 peer reviews done by the end of next sprint
- Communicate individual work item priorities daily during sprint stand-ups in order to manage what items are lagging in effort

- Finish at least 2 DAR metric tests for geolocation by the end of next sprint
