

# **Sprint Retrospective 05: 11/12 - 11/19**

**Scrum Master:** Sarah S.

## **What went well this sprint?**

- Asking in-depth questions for milestone 1
- Consistent daily stand-ups
- Useful secondary help for work items

## **What went wrong or lacked this sprint?**

- Not enough information from class to finish low-level design for security
- Lack of progress on starting milestone 2 work items because revising milestone 1 work items
  - This means only 2 weeks to work on all of milestone 2
- Email feedback delayed = less time to do revisions for milestone 1
- Adding in log target last minute = more logging library revisions

## **What will we carry over to the next sprint?**

- Continue low-level design for security library
- Continue network diagram

## **What will we do differently next sprint?**

- Ask questions as we go along instead of sending a completed work item for feedback
- Set up git branches in advance for better organization and integration
