

# **Sprint Retrospective 08: 2/01 - 2/15**

**Scrum Master:** Sarah S.

## **What went well this sprint?**

- Implemented controllers/entry point for app's account center and security
- Constant communication with client/Vong for all work items this sprint
- Received code review due dates for all team members
- First Demo Day with Frank on UI design for Account Recovery

## **What went wrong or lacked this sprint?**

- Needed to modify project plan in order to fit code review due dates
- Misunderstanding of definition of "implementation"
  - Unable to satisfy initial demo day expectations for account recovery
- Misunderstanding of definition of "UI"
  - Means HTML, CSS, and JavaScript
- Had take on new DAR Report for Email implementation
  - More to take on this sprint/ short of time to finish within this sprint
- Unable to get both DAR Reports approved
  - Need to push back work items for next sprint to fit in reports

## **What will we carry over to the next sprint? (Action Plan)**

- Continue designing app-specific features in order to start coding by the end of February
- Continue feedback and revisions during office hours and via email to get DAR metrics approved for Geolocation and Email Integration
  - Approve DAR reports by the start of March
- Complete controllers and HTML/CSS for all of account center and security by the end of next sprint

## **What will we do differently next sprint? (Action Plan)**

- Implement team and individual percentage error charts for all sprints with all actual hours available by the end of next sprint
- Clarify terms and definitions of work items in sprint when discussing demo day with client/Vong in order to avoid misunderstandings of what is expected to be done by the end of the sprint
- Communicate with client as soon as there is a change in plan or need for clarification on any work items and what is expected
- Focus on implementing front-end designs into HTML and CSS to prepare for merging with back-end using middleware in next sprint
