

Sprint Retrospective 15: 5/06 - 5/12

Scrum Master: Sarah S.

What went well this sprint?

- Reviewed BRD and implemented use cases in final product
- All features (core and app-specific) function properly
- Three in-person meetings this sprint to finish all features
- Data tables up to date for production
- Implemented configs for frontend and backend

What went wrong or lacked this sprint?

- Final deployment on Sunday (5/12) instead of the 5/10 due to rising warnings/problems between features
- Last-minute modifications to all unit tests in order to make them fully automated

What will we carry over to the next sprint? (Action Plan)

- No next Sprint: Present final project in production on Monday 5/13
- Have one last meeting in person to practice presentation at least 2 hours before presentations

What will we do differently next sprint? (Action Plan)

- No next Sprint: pass all classes and graduate on 5/19
 - relax and destress for at least one week after graduation
