

# **Sprint Retrospective 14: 4/22 - 5/01**

**Scrum Master:** Sarah S.

## **What went well this sprint?**

- Kay's second review (Task Manager Hub) improved from the first one
  - Implemented security and frontend testing
- Team Review: communicated with client about work progress
- Team communicated availability for in-person meeting
  - In-person team meeting this sprint
- No GitHub merge conflicts this sprint

## **What went wrong or lacked this sprint?**

- Team Review: not enough detail in task breakdown, not up to date with work progress/integration
- Features are not working seamlessly
  - Unable to run all features together
- Incomplete core requirements (account deletion, user profile/account)

## **What will we carry over to the next sprint? (Action Plan)**

- Complete all features and core requirements by May 10th
- Communicate when to meet for in-person meeting at the start of next sprint
- Align all data tables amongst team members at the start of next sprint
- Seamlessly integrate all features together by May 10th

## **What will we do differently next sprint? (Action Plan)**

- Meet at least 2 times in person next sprint in order to finish project by May 10th and present website by May 12th
- Go into more quantifiable detail with task breakdown during last sprint planning
- Review all BRD use cases as a team during last in-person meeting to ensure our project is a complete working system
